Air Transat Flight 236 was a transatlantic flight bound for Lisbon, Portugal, from Toronto, Canada, that lost all engine power while flying over the Atlantic Ocean on August 24, 2001. The Airbus A330 ran out of fuel due to a fuel leak caused by improper maintenance. Captain Robert Piché, 48, an experienced glider pilot, and First Officer Dirk de Jager, 28, glided the plane to a successful ...

Just found a operations manual for Tu-144C. Interesting enough was the page with an example of flight planning. This 3,300 km route coincides with the real commercial route Tu-144C Moscow-Almaty, the flight time was 2 hours, trip fuel 76.5 tons, headwind 80 km / hour. The Tu-144C was definitely the most uneconomical passenger aircraft ever.

The flight deck was the most spacious of anything I've seen, including the 747 and DC10, and it was a delight to hand fly. Though flight was normally highly automated through the FMS system, two disconnect buttons- autopilot and auto throttle- instantly gave you a fully manual aircraft, a result today's Airbus pilots can only dream of!
