a particular model of the Allison 501/T56 engine is established on the basis of engineering considerations, user experience, and a careful evaluation of any safety factors involved. Within that time period, however, an engine's individual maintenance requirements are largely deter-mined by the effects of the operating environment upon

A SERVICE PUBLICATION OF - Lockheed Martin
The Rolls-Royce T56 is a single-shaft turboprop engine with a 14-stage axial flow compressor driven by a four-stage turbine. The gearbox has two stages of gear reduction and features a propeller brake. The gearbox is connected to the power section by a torque meter assembly.

Rolls-Royce T56 Turboprop Engine | PowerWeb
The engine's commercial version, the T56 501-D, is the world-leading large turboprop engine. The T56 is a single shaft, modular design, turboprop engine. The gearbox has two stages of gear reduction, features a propeller brake and is connected to the power section by a torquemeter assembly.

T56 - Rolls-Royce
Allison-manufactured 501/T56 turboprop engines have been used exclusively to power Hercules aircraft from the YC-130 to the aircraft's present configuration, the Advanced C-130H. This is neither happenstance nor merely an artifact of previous practice. It is the consequence of a special, ongoing partnership between two compa-
