The car is powered by a twin-turbo 3.6 L Audi PL V8 mated to an upgraded 5H19 five-speed automatic transmission sitting on a custom chassis. The engine produces 440 horsepower at 0.8 bar (11.6 psi) for the street or 700 horsepower at 1.4 bar (20.3 psi) for racing.

Beetle with a Twin-Turbo Audi V8 - Engine Swap Depot

The bulk of the labor time for the repair of the Audi 4.2L V8 Chain Engine is spent on tear down and re-assembly as the time required to physically replace the chains, guides, and adjusters is rather quick for our experienced Audi service team. As with all internal engine service / repair, great attention to detail is spent to ensure proper ...

Audi V8 Timing Chain Service: The Real Story | RSW ...

Physically I don't see any reason it wouldn't fit. The v8 has been shoehorned in B5 cars and the C4 does have more room. I've heard that the V6 and V8 engine mounts are pretty darn close. Something like an inch different fore/aft. Using a Mustang Transmission mount as an engine mount may allow you to more-or-less bolt that V8 right in place.

Audi 100 v8 swap? :: motorgeek.com

Sitting behind the driver is an all-aluminum 4.2 L V8 and six-speed manual transmission from a 2004 Audi S4. The engine produces 350 horsepower and 320 lb-ft of torque in a vehicle that weighs 1100 kg (2425 lb). They installed the engine and transmission using a custom tube subframe.

Get Free Audi V8 Engine Swap Necrb

Hi all, I have a 2012 A4 Avant S-Line, 8spd automatic ZF8HP55 with 169,000KM, engine is running good with oil consumption. I drive average 35,000km per year, hopefully I can drive it for another 2-3 years. Anyway, I am doing research and wondering what's the available options for engine swap. I assumed transmission needs to be swapped if I use a S4, SQ5 S5 or RS5 engine, can someone confirm that?

B8 A4 Engine Swap Options - Audizine

First they shoehorned a 4.2 L ABZ V8 from an Audi A8 D2 in the engine bay. These are good for 295 horsepower and 295 lb-ft of torque in stock form. Then they installed an AWD manual transmission and rear end from an Audi 2.5 L TDI. Even the suspension comes from Audi. The front is taken from an Audi 80 and the rear comes from an Audi A8 D2.

AWD Golf with an Audi V8 - Engine Swap Depot

The owner settled on using a 4.2 L Audi ABZ V8 engine because it would bolt directly to the Porsche transaxle and only cost \$800 to replace. On 91 octane fuel the engine makes 313 horsepower to the rear wheels. Behind the engine sits a 034 Motorsports flywheel and Southbend clutch connected to a Porsche 987 six-speed transaxle and Drexler LSD.

Porsche Boxster with an Audi V8 - Engine Swap Depot

Every engine is reverse engineered, allowing ATK to find and remove any factory original defect. This attention to detail and quality will save you time and money by keeping your Volkswagen or Audi out of the shop and on the road. Engines are factory checked after assembly to ensure proper operation.
