If you look into fig. above Tank 1 is largest tank. Hence calculate volume of Tank 1.

Volume of Tank 1 = $\pi \times R^2 \times H$ Where, " π " = 3.14159265, " R " is Radius of Tank and " H " is height of Tank. Step 2: Calculate Volume of all intermediate fire walls and low level large bore piping. Or any other items located inside the bund.
