To be honest - IBM's poorly handled re-branding, confusing dilution of the AS400 brand and lack of marketing is the main culprit (imho of course). Thirty years ago, the new versions of the AS400 launched with a different name (AS400/E , iSeries and then System i) but even the terminal mode menu's still made reference to "AS400".

"Having taught RPG at the community college level, I know that schools won't offer those courses unless there's a demand from students," IS consultant Matthew Qualls of Ohio says in a LinkedIn post. "IBM needs to market the IBM i. There's no name recognition. Now if they associate it with Watson, that's some brand recognition!"

Re: The best training for a new RPG programmer We spent a month doing ATS courses learning AS400 sytem operations, CL, RPG/400, display files, subfiles and RPG IV with the final module covering sub procedures. I think it's helpful to learn the basics of the platform first. On the copying other programs front I've seen a lot of that.
