Independent/Dependent Events Two events are independent if the result of the second event is not affected by the result of the first event. If A and B are independent events, the probability of both events occurring is the product of the probabilities of the individual events.

Independent Events

An independent event is an event in which the outcome isn't affected by another event. A dependent event is affected by the outcome of a second event. Using the example of the ticket drawing, the dependency is established in the second drawing, as with ticket A no longer in play, the possible outcomes
