Event-driven architecture (EDA) is a software architecture paradigm promoting the production, detection, consumption of, and reaction to events.. An event can be defined as "a significant change in state". For example, when a consumer purchases a car, the car's state changes from "for sale" to "sold". A car dealer's system architecture may treat this state change as an event whose occurrence ...

The earliest documented use of the word Arab in reference to a people appears in the Kurkh Monoliths, an Akkadian-language record of the Assyrian conquest of Aram (9th century BCE). The Monoliths used the term to refer to Bedouins of the Arabian Peninsula under King Gindibu, who fought as part of a coalition opposed to Assyria. Listed among the booty captured by the army of the Assyrian king ...

### Introduction to Networking Protocols and Architecture

Skylake is the codename used by Intel for a processor microarchitecture that was launched in August 2015 succeeding the Broadwell microarchitecture. Skylake is a microarchitecture redesign using the same 14 nm manufacturing process technology as its predecessor, serving as a "tock" in Intel's "tick-tock" manufacturing and design model. According to Intel, the redesign brings greater CPU and ...

New material has been added since the 6th edition (which covered Windows 7 and Windows Server 2008 R2). Since the 7th edition's part 2 is not yet available, the Windows Internals 6th edition (written by Mark Russinovich, David Solomon and Alex Ionescu) is an invaluable resource on missing topics from the first part of the 7th edition.
