Engines that rely on timing belts are more suited to inland waterways. It is not easy to make a lightweight and powerful top class diesel engine owing to the immense pressures and heat produced within the engine. These problems were solved by VM Motori of Cento and the engines were apparently so good that Rover, Ford and Jeep bought them.

History of the diesel car - Wikipedia

Diesel. The first production inline-five engine for a passenger vehicle was the Mercedes-Benz OM617, a 3.0 L diesel engine introduced in 1974 and used in the Mercedes-Benz 300D, considered to be one of the most reliable engines ever produced, often exceeding 400,000 miles without being rebuilt. It was first turbocharged in 1978. Its successor, the OM602, used in the Mercedes-Benz W124, G-Klasse ...

Straight-five engine - Wikipedia

In 2014, FCA introduced a new diesel engine to the Ram 1500 and the Jeep Grand Cherokee, the 3.0L EcoDiesel. Unlike their larger 6.7L engine found in their Heavy Duty trucks, this engine isn't made by Cummins. Instead, the EcoDiesel is manufactured by VM Motori, an affiliate of FCA, at their Cento Facility in Ferrara, Italy.
